

**Prof. Dr. med. dent.
Fouad Khoury**

Born in Lebanon

1978 DMD, St. Joseph University, Beirut

1978 – Specialization in Oral Surgery
1984 at the Universities of Freiburg & Muenster, Germany

1986 – Assistant Professor and later Associate Professor
1994 at the Dep. of Oral and Maxillofacial Surgery of the University of Muenster, Germany

1988 Habilitation (PhD) and senior surgeon
at the Dep. of Oral and Maxillofacial Surgery of the Uni. of Muenster

1994 Professor at the Uni. of Muenster

Current Position Chairman and Director of the Privatklinik Schloss Schellenstein Olsberg, Germany

Professor at the Dep. of Oral and Maxillofacial Surgery of the Uni. of Muenster

Past President of the Oral and Jaw Surgery Society (AGOKI) of the German Dental Association

Chairman of the examination comity for Oral Surgery

Associate Editor of
The International Journal of Oral Implantology

Member of editorial board of several international journals

Several Prices (e.g., Pioneers in Dentistry 2016 AUB, W. Laney Award 2017 American A. Osseointegration) and Patents

Editor and author of four bestseller Textbooks translated to more than 10 languages

More than 140 publications and 1000 lectures / courses.

Terms and conditions

The success of the courses is essentially dependent on proper preparation and organization. Please help us by submitting your early written application.

1. You will receive a course confirmation and invoice after your application. The course fee includes 19% VAT.

2. The course fee is payable two weeks after receiving invoice. Please don't pay the fee later than eight weeks before the course starts. Please settle the amount by bank transfer to the following account:

Account holder: Privatklinik Schloss Schellenstein

Volksbank Brilon Büren Salzkotten eG

IBAN: DE45 4726 0121 7851 9494 00 · BIC: DGPBDE33XXX

The distribution of course places takes place after receiving the payment. The seats can't be reserved.

3. Registration for the course is binding upon receipt of payment.

4. If you need to cancel your registration to the course up to eight weeks before the course starts, the course fee will be refunded. From 8 weeks before the course starts, the course fee will not be refunded, but the registration can be transferred to another course participant.

5. If the course is cancelled for organizational reasons, we can't be held responsible for the incurring costs. This also applies to requirements regarding the content, implementation and other framework conditions of a course.

6. The participant accepts our terms and conditions by registering.

Jurisdiction is Brilon.

For harvesting autologous bone blocks

Discover the difference

Harvesting autologous bone with the MicroSaw according to Prof. Dr. F. Khoury

For smooth and bone-preserving preparation of bone blocks and access windows

- **Precision^{1,3}** – The 0.29 mm thin MicroSaw disc enables an extremely accurate osteotomy line.
- **Speed^{1,3}** – The rotation speed and efficiency of the diamond disc enables significantly faster osteotomies and thus reducing the treatment time
- **Safety²** – Reliable protection of the soft tissue, direct blade cooling prevents overheating during the procedure
- **Proven** – in clinical use since 1986.

The course begins on Thursday 12th September in Olsberg with several live surgeries on patients and will finish on Friday afternoon at 03.00 pm. The hands-on-training on cadaver is starting on Saturday morning at 09.00 am at the Institute of Anatomy of the University of Münster. The cadavers are prepared with an exceptional and unique method called "Thiel fixation". This method leaves to the soft tissue enough elasticity to perform in a realistic way the various techniques of soft tissue management and bone grafting.</p> <p>Program:</p> <ol style="list-style-type: none"> > 12 hours live surgeries Advanced soft tissue surgery, pediculated palatal flap... New techniques of bone grafting to improve the prognosis 3D bone reconstruction and tunnel technique Sinus floor elevation and nerve lateralisation Complications <p><i>The participant needs previous knowledge in implantology and should attended augmentation ! procedures part II!</i></p> <p>The program of the hands-on-training on cadavers also includes the following interventions:</p> <ol style="list-style-type: none"> Tooth extraction and immediate implantation Covering the alveoli with free or pediculated connective tissue graft. Kazanjian vestibuloplasty Retromolar and chin bone harvesting with the MicroSaw Sinus floor elevation, nerve lateralisation Bone splitting and bone spreading Lateral + vertical 3D bone grafting procedures & tunnel technique <p>Course dinner on Thursday and Friday at about 8 pm.</p> <div> Course fee: € 3.990,- (+19 % Tax) </div> <div>25 points</div> </div>	<div>Clinical Masters</div> <div>Clinical Masters Program in Bone Grafting and Soft Tissue Management</div> <div>       </div> <div> <p>6-days intensive course <i>including theoretical background, Live Surgeries and hands-on-Training on human cadavers</i></p> <p>Team: Prof. Dr. Fouad Khoury, Dr. Charles Khoury and team</p> <p>Date:  16.-21.09.2024 English</p> <p>Day 1-4: 09:00 am to 06:30 pm Day 5: 08:30 am to 04:00 pm Place: Privatzahnklinik Schloss Schellenstein, Olsberg</p> <p>Day 6: 09:00 am to 02:30 pm (hands-on-cadavers) Place: Institute of Anatomy at the University of Münster</p> <p>During this 6 days training different topics of the courses I-IV will be presented and discussed, from simple minimal invasive bone grafting to 3D vertical bone augmentation. Theoretical background supported with live surgeries and hands-on-training is presented for every topic. The course is focusing on understanding the biological principles of bone and soft tissue healing. On the last day the participants have the chance to do different surgeries on human cadavers (Thiel fixed) with the support of the clinic staff. Thiel fixation is a very unique technique giving the tissue excellent quality which is very similar to living tissue. This makes hands-on-training very close to real surgery in the office.</p> <p>Program:</p> <ul style="list-style-type: none"> > 15 hours live surgeries Planning from simple to complex treatment Principles of grafting procedures and bone biology, Pathophysiology of bone transplantation Principles of soft tissue biology and soft tissue healing: surgical design, blood supply, incisions, vestibuloplasty, pedicle flaps, connective tissue grafts, roll flap, apically repositioned flap... Minimal invasive bone augmentation: bone core technique Safe bone harvesting from all possible intraoral sites Biologic bone grafting procedures: lateral and vertical bone augmentation, Split Bone Block Technique, 3D reconstruction, tunnel approach, sinus floor elevation. Restorative concept and procedure. Complications and possibility of prevention and treatment <p>Course dinner on Monday, Thursday and Friday.</p> <div> Course fee: € 9.990,- (+19 % Tax) </div> <div>56 points</div> </div>	<div>Sedation course</div> <div>Sedation procedures for oral surgery</div> <div> <p><i>with live surgeries</i></p> <p>Team: Dr. Dr. Wolfgang Jakobs and team</p> <p>Date:  27.-28.09.2024 German</p> <p>Friday, 27.09.2024, 01:00 pm to 07:00 pm Saturday, 28.09.2024, 09:00 am to 05:00 pm</p> <p>Sedation procedures are becoming increasingly important in medicine and dentistry and are essential, especially for the performance of extensive oral surgery or implantological procedures.</p> <p>They offer patients the opportunity to experience extensive and invasive therapeutic procedures without fear and stress. In addition to effective analgesia through local anesthesia, it is possible to improve the patient's willingness to cooperate through sedative measures.</p> <p>Following the international training programs of the „European Federation for the Advancement of Anesthesia in Dentistry - EFAAD" and taking into account the guidelines for sedation procedures of the „American Dental Society of Anesthesiology - ADSA" as well as the „SAAD", UK and with reference to further international guidelines, curricula and current reviews, the theory and practice of sedation measures will be presented.</p> <p>Course topics include:</p> <ul style="list-style-type: none"> Live surgery with intravenous sedation Presentation of theory and practice of sedation measures in dentistry and oral surgery Patient selection and recognition of risk factors Control of sedation with different pharmaceuticals Pharmacology of the preparations used monitoring Intra-postoperative monitoring, discharge criteria Recognition and management of potential complications and adverse events Practical exercises and complication management, final test <p>Number of participants: limited</p> <div> Course fee: € 990,- (+19 % Tax) </div> <div>14 points</div> </div>
